

LEDVANCE Retrofit Kits

Magnetic Bar Retrofit Kits

Application

Magnetic Retrofit Bar Kits can replace fluorescent lamps in a variety of existing fixtures with offerings in 2ft, 3ft, or 4ft lengths paired with up to 3 different drivers for 24 different combinations. The magnetic strip allows for a quick installation while securing with screws. It also provides 12Vdc auxiliary output that enables easy addition of wired/wireless controls and sensors to a project. That will not only maximize energy savings, but will provide high quality light for office, education, and retail applications.

Benefits and Features

- Drivers have 12V Aux to work with sensors
- Available in 2ft, 3ft, and 4ft linear options
- Includes 1-4 connections on each driver for multiple lamp applications
- Dimmable down to 20% with 0-10V driver to maximize energy savings and optimize light levels
- Aluminum substrate for excellent heat dissipation
- See System Data section for DLC approved systems
- No warm-up time, instant-on with full light output and stable lamp-to-lamp color
- No UV emission
- System Efficacy up to 160 LPW (without lens)
- 3500K, 4000K, 5000K color temperatures
- CRI >80
- Beam angle: 120° with frosted plastic optics

Electrical

- Three selectable wattage drivers available in 120-347V
- Power Factor >0.9
- THD <20%
- Dimmable (20-100%)
- Compatible with LEDVANCE EMBB (61097)

Rated Life

- 65,000 hours (L₇₀)

Operating Temperature

- -40°F to +104°F (-40°C to +40°C)

Wattage Comparison

Traditional Source	Traditional System Wattage	LED System Wattage	Energy Savings
2ft 17W T8 w/QHE 2 × 32T8/UNV ISN-SC	29	20	31%
3ft 25W T8 w/QHE 2 × 32T8/UNV ISN-IC	43	20	53%
4ft 32W T8 w/QHE 2 × 32T8/UNV ISN-SC	55	20	64%
4ft 32W T8 w/QHE 2 × 32T8/UNV ISN-SC	55	40	27%

Warranty

- Retrofit Kit (driver and magnetic bars) is covered by a 5-year limited warranty. For additional details, please visit www.ledvanceUS.com/warranty
- NLB Trusted Warranty Program

Certifications and Listings

- cETLus (damp location)
- RoHS
- FCC
- DLC 5.1 Standard / Premium*

Installation

- Please refer to the Installation manual included inside the packaging and the applications information listed below for more information.

Wattage and lumens is total per system. Ex: If 2-2ft bars on system then total wattage is 20W–10W per bar and total lumens is 3200–1600 per bar. Maximum wattage per bar is 20W for any length.

DIP Switch Setting

Application Information

- These LED bars require an external driver and are intended to be used with LEDVANCE branded direct-current drivers included in this specification as a System.
- All installation, inspection, and maintenance of lighting fixtures should be done with the power to the fixture turned off. Retrofit kits should be installed and operated in compliance with the National Electrical Code (NEC), Underwriters Laboratories Inc. (UL) requirements, and all applicable codes and regulations.
- EM ballast that operates with fluorescent ballasts must be disconnected from the retrofit kits.
- Best practice: cap off the remaining ballast wires should the ballast be left in the fixture after disconnecting.
- To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects. Do not make or alter any open holes in an enclosure of wiring or electrical components during kit installation.
- Refer to the label on the driver for proper DIP switch arrangement for appropriate LED magnetic bar power.
- Do not use 3-4 lamp driver to operate less than 3 magnetic bars.
- Operating temperature range between -40°F and 104°F (-40°C and 40°C).
- Storage temperature range between -40°F and 176°F (-40°C and 80°C).
- Suitable for use in dry and damp environments.
- Suitable for open and enclosed fixtures. Enclosed is a fixture with lens or diffuser. It is not a vapor tight gasketed fixture.
- Please read all installation instructions before attempting installation.
- For detailed warranty information, please see www.ledvanceUS.com.
